Other Options: to locate other outlets in northeast Wisconsin, check out the website Earth 911 at <http://earth911.org/electronics/>

Private citizens are required to recycle electronics as of September 1, 2010.

These items include:

- Computers
- Monitors
- Televisions and other video display devices
- Fax machines
- DVD and VCR players
- Printers
- Cell Phones

Wisconsin law requires businesses and institutions to recycle discarded electronics or handle them as a hazardous waste.

Televisions and other electronics contain valuable, reusable materials. Plastics, glass, scrap metal (including copper and gold), and many other materials can be extracted from old TVs and used to make new products.

Televisions contain harmful materials, including lead, chromium, mercury, and polybrominated flame retardants. If landfilled or incinerated, these chemicals can be released into groundwater, surface water, or the air where they pose a risk to humans and the environment.
