Church Avenue Construction Update

(Oshkosh, WI.) The city of Oshkosh would like to notify citizens that the contractor on the Church Avenue road construction project has now started concrete paving.

The north side of Church Ave. will be placed first. Due to the limited roadway width available during the concrete pouring and curing, Church Ave. will be designated a one way street eastbound from Franklin Street to Main Street.

The one way traffic arrangement is anticipated to last approximately three weeks. The contractor will maintain a minimum of one driveway at all times to the main City Hall parking lots. The driveway from the Safety building onto Church Ave. will be closed for up to one week when the south side concrete pavement is placed.

Driveway access to local businesses will be blocked for approximately one week when the south side concrete pavement is placed, and again when the drive aprons are replaced. Pedestrian access will be maintained to the businesses when driveways are unavailable.

Please contact the Engineering Division at (920) 236-5065 with any questions.
