

## Assessment History from Present to 1918

Net Tax Rate per \$1000 - Also referred to as the mill rate, the tax rate is defined as the tax levy (as determined by the taxing entities) divided by the tax base.					
Percent of Full Value - Each year the Department of Revenue analyzes the sales of properties in each assessment jurisdiction. The average ratio of assessed value to sales price is determined for equalization purposes. That ratio, usually expressed as a percentage, is referred to as the equalized ratio or level of assessment. Its primary function is for apportionment of taxes fairly among municipalities.					
Lottery Credits: Owners of a home in Wisconsin who use the home as their primary residence on January 1 (Certification Date) of the year in which property taxes are levied receive a property tax credit from the State Lottery. The amount of the credit changes each year.					
Assessment Year	Total City Assessment	Net Tax Rate per \$1000	Percent of Full Value	Total Full Value	Lottery Credit
